

FULL-STACK WEB & APPLICATION DEVELOPER

Kansas State High School Activities Association

Topeka, KS | Full-Time

Organization Overview

An organization focused on supporting the mission of overall student growth and development through student participation in education-based athletic and activity programs. This is accomplished through the administration of interscholastic activities, festivals, clinics, and contests among member schools, culminating with state championship events.

This association provides support and leadership to over 750 member high schools and middle schools, over 200,000 Kansas students, and 4000 registered officials.

The Position

The Kansas State High School Activities Association is continually looking for ways to update and improve our technology infrastructure to make current processes more user friendly and efficient. We are looking for a person with a passion for using their web development/programming skills to enhance systems and processes. If you are a detail-oriented problem-solver who enjoys new challenges, a fast-paced work environment, contributing to a team mission, and school sports and activities, this position could be for you!

The **Full-Stack Web & Application Developer** is responsible for providing comprehensive internal and external technology support through custom programming, website design and database administration. This position also provides support for all technology hardware related matters within the organization.

Working with, and under the direction of the Information Technology Manager, position responsibilities include:

- Learn business objectives, policies and procedures and contribute to the development and continual evaluation of short and long-term technology improvement plans.
- Maintain and improve upon existing web-based applications and technology infrastructure while developing new applications identified and prioritized by Association leadership.
- Maintain and upgrade KSHSAA websites.
- Manage KSHSAA databases.
- Repair/debug internal and external applications.
- Maintain staff user accounts and ensure appropriate cyber security measures are in place.
- Evaluate and implement third party software applications when necessary.
- Provide hardware support for Association staff.
- Contribute to the technology needs of the print production operation.
- Develop technology operational documentation.
- Work onsite in Topeka, KS, M – F.
