

## **KSHSAA Concussion Reporting Summary 2023-2024 School Year**

Sport related concussions are a traumatic brain injury caused by biomechanical forces. The force can be a direct blow to the head or an indirect blow leading to a sudden acceleration/deceleration of the skull. Concussions are a functional injury to the brain, meaning structural injuries will typically not be present or appear with standard neuroimaging studies (MRI, CT scan). A concussion diagnosis by a physician is based on observed signs and reported symptoms by the student-athlete, and a series of neuro-cognitive tests administered by a healthcare professional. An athlete does not have to lose consciousness to sustain a concussion. Continuing athletic participation after sustaining a concussion or while a concussion is still resolving can have very serious consequences, including death. Therefore, over the past several years a greater emphasis has been placed on concussion recognition and proper management at all levels of athletics, including the high school/middle school level.

In 2011 the Kansas Legislature enacted the School Sports Head Injury Prevention Act requiring any student-athlete who is suspected of sustaining a concussion be immediately removed from the activity and not permitted to return until they receive written clearance from a physician (MD or DO). For the past several years Kansas coaches and student-athletes have been required to go through annual concussion prevention, recognition and management training. By recommendation of the KSHSAA Sports Medicine Advisory Committee and approval of the KSHSAA Executive Board, the 2018-2019 school year marked the first year KSHSAA member schools (grades 7-12) were required to report concussions to the KSHSAA. Only concussions sustained while participating in a KSHSAA sponsored activity (practice or competition) are to be reported to the Association. School personnel report concussions through a secure online portal, using a two-step process. The first step is to report the concussion injury and answer several questions about the injury as soon as possible after the injury occurs. The second step is to provide the date the student was cleared to resume participation. With this information the KSHSAA can determine concussion incidence by activity (and other criteria) as well as calculate the average number of days student-athletes miss due to concussions in each sport. No personally identifiable information is collected.

Concussion incidence = # Concussions reported / Total participants in the activity

The following tables summarize the 2023-24 concussion reporting data submitted by member schools. The KSHSAA and the KSHSAA Sports Medicine Advisory Committee are extremely grateful for the efforts of all member schools in reporting concussion data. Having quality Kansas data to evaluate is invaluable in helping make well informed policy decisions and to minimize the risk of activity participation for Kansas students.

**Table 1 – General reporting statistics**

	<b>Reported Concussions</b>	<b>Total Participants*</b>	<b>Incidence</b>
<b>2023-24</b>	1516	111,810	1.36%
<b>2022-23</b>	1467	110,061	1.33%
<b>2021-22</b>	1082	107,692	1.00%
<b>2020-21</b>	857	94,760	0.90%
<b>2019-20</b>	1769	108,490	1.63%
<b>2018-19</b>	2127	112,116	1.90%

	<b># Schools Reporting at least 1 case</b>	<b>Total member schools</b>	
<b>2023-24</b>	349	752	46.41%
<b>2022-23</b>	290	754	38.46%
<b>2021-22</b>	241	758	31.79%
<b>2020-21</b>	262	760	34.47%
<b>2019-20</b>	413	760	54.34%

\* Total participants = total number of students submitted through the KSHSAA online eligibility portal. All athletes and spirit participants are to be reported. Students are reported one time, no matter how many sports they participate in.
